

Edit your fstab config

1. First you need to run.

1. `sudo nano /etc/fstab`

2. This is the next line that you need to paste in. Make sure you have a directory created that you want to mount your share to.

1. `//pathtoshare /localmounteddir cifs
username=changeme,password=changeme,uid=1000,gid=1000 0 0`
